

Converge.

The [Avaya Compatible Plantronics Voice Portfolio](#) invites a seamless, intuitive communication experience across all mediums

Avaya Unified Communications + Plantronics

The advantage is clear

As a preferred headset provider for Avaya Unified Communications (UC) and Contact Center solutions, and an Avaya DevConnect Platinum member, Plantronics audio endpoints are specifically engineered to maximize Avaya next generation workspace applications. The Plantronics portfolio offers the ultimate user audio and call management experience, regardless of device or where teamwork happens.

Plantronics voice solutions are easy to use, provide crystal clear audio and rich functionality across the UC spectrum of voice, video, IM, data and social media, and seamlessly integrate into preferred work styles – all of which make collaboration natural, simple and intuitive.

UC+

The Avaya Advantage

As the sole provider of headsets to Avaya for 40 years, the Plantronics portfolio offers the best integration experience for Avaya UC and is the only company that can offer call control with Avaya one-X®.

- Avaya one-X® Communicator
- Avaya one-X® Agent

Better conversations lead to better business

With products designed for a wide range of environments, users and applications, Plantronics meets the diverse communications needs of an enterprise. By offering users access to comfortable headsets with superior audio quality, companies can realize increased adoption of UC applications across the board. What's more, a single compatible portfolio reduces IT implementation costs and complexity.

- The Savi® Series for office wireless users unifies traditional telephony and PC communications with a single, wireless DECT™ headset that lets users seamlessly switch between audio sources.
- The Voyager PRO UC is the wireless Bluetooth® headset that unifies communication between PC and mobile phone calls.
- The Blackwire™ Series lets professionals who prefer corded headsets enjoy crystal clear PC audio no matter where work happens.
- For those transitioning from traditional to PC telephony, the Calisto® Series includes a USB speakerphone and a USB handset to effectively manage PC calls.

Nearly 50 years of audio innovation

Plantronics introduced the first lightweight headset in 1962 and has been at the forefront of sound innovation and call management ever since, creating proprietary, patented technology to further audio excellence.

You'll find superior technology across the Plantronics portfolio. Our advanced noise-canceling microphones filter out background distractions so customers can hear clearly. AudioIQ² technology adapts listening levels automatically so users are heard clearly, while SoundGuard® technology provides protection against audio spikes, leaving conversations uninterrupted. For outside environments, microphones with WindSmart® technology reduce disruptive wind sounds.

Exceeding expectations, on every level

- **True Avaya compatibility**
Avaya compatible Plantronics solutions work across devices, across platforms and across Avaya next generation workspace applications – from desk phones to PCs to mobile phones, from Avaya one-X® Agent to one-X® Communicator.
- **Superior user experience**
Plantronics intelligent voice technology offers consistently superior sound clarity and comfort with the highest-quality headsets, handsets and speakerphones available today.
- **Extensive range of solutions**
Plantronics offers a broad product portfolio to best meet individual user needs and preferences – from the corporate office to the home office, from stationary to on the go.
- **Unsurpassed support**
Plantronics global reach and world-class service and support is second to none. Access 24/5 service and support in 126 languages worldwide, online HELP with 24-hour email turnaround, and live chat.
- **Acoustic Intelligence**
Plantronics audio solutions are designed for real-life interaction and everyday use – incorporating the most advanced technology in noise cancellation, echo suppression and safety.
