

## Calisto™ Pro: PerSonoCall™ Softphone Compatibility

PerSonoCall software provides the link between your Calisto Pro and the softphone application on your PC. PerSonoCall software gives you the ability to remotely detect and answer/end a call via the Calisto Pro handset or headset.

If your softphone of choice is not listed as being supported, you can still use your Calisto Pro as an audio device, but you will not have the ability to remotely detect and answer/end a call. PerSonoCall is not currently compatible with Mac/OS.

**Note:** This compatibility list is updated frequently so be sure to always check the Calisto Pro product page for the latest information.

Vendor	Application	Minimum version	Calisto version of PerSonoCall*
